***Title: Getting to Know Stevanus: A Glimpse into My Life***

Hello Everyone, let's me introduce myself, my name is Stevanus Andika Galih Setiawan, but you can call me Steven. I'm 18 years old and I want to share a little about myself.

One of my biggest interests is reading books. Books that I like are books about self-development and tutorials about programming/information technology. Coding and programming are other fields that I am very interested in. The ability to create something from scratch and bring my ideas to life through technology is extremely rewarding. Apart from that, I like playing games, both on the computer and on the smartphone.

One of my strengths is my enthusiasm for learning new things. I thrive on the idea of continually improving and keeping up with the ever-evolving world of technology. Apart from that, I am adaptable and easily blend into new environments and make friends.

However, like everyone else, I have weaknesses. Sometimes I tend to be forgetful, and this can be quite confusing. I also have a tendency to get bored quickly, so I need to challenge myself with new activities. Lastly, my emotions are unpredictable, and I am working on managing them better.

In conclusion, I am a young individual with a strong passion for knowledge, technology and the creativity that comes with it. Even though I have weaknesses, I am always eager to overcome them and continue my journey of self-discovery and personal growth.

This is a brief self-introduction about me.

Sorry and thank you
